Original Essay

The bar chart compare the percentage of Australian in different age groups between men and women who did regular physical activity in 2010.

The proportion of male doing regular physical activity was higher than that of female at the age between 15 and 24.However, the percentage of Australian men who did regular physical activity was lower as for the age group 25 and over.

Male who were between 15 and 24 years old saw the highest proportion in 2010 with the percentage of 52.8%, while 53.3% women at the age group 45 to 54 did regular physical acitivity. Around 47% of Australian who were over 65 years old kept a regular basis to do physical activity.

The age group 35 to 44 saw the largest difference between men and women the whole year, and the percentage of women was the lowest at the same time.What's more, the average proportion of male was higher than that of female in 2010.

Grammar & Spelling Check

Case 1

Original: The bar chart **compare**

Corrected: The bar chart **compares**

Reason: Subject-verb agreement error. “Bar chart” is singular, so the verb should be “compares”.

Case 2

Original: the percentage of **Australian**

Corrected: the percentage of **Australians**

Reason: A plural noun is needed because it refers to people in general.

Case 3

Original: The proportion of **male**

Corrected: The proportion of **males**

Reason: “Male” should be plural when referring to a group of people.

Case 4

Original: that of **female**

Corrected: that of **females**

Reason: Parallel structure requires both nouns to be plural.

Case 5

Original: at the age between 15 and 24

Corrected: in the age group **between 15 and 24**

Reason: “Age group” is the correct academic expression.

Case 6

Original: 24.**However**

Corrected: 24. **However,**

Reason: Missing space and comma after the transition word.

Case 7

Original: was lower **as for** the age group

Corrected: was lower **for** the age group

Reason: “As for” is incorrect in this context.

Case 8

Original: **Male** who were between 15 and 24 years old

Corrected: **Males** who were between 15 and 24 years old

Reason: Plural noun is needed.

Case 9

Original: with the percentage of 52.8%

Corrected: **at** 52.8%

Reason: “At” is the standard preposition used with percentages.

Case 10

Original: while 53.3% women at the age group 45 to 54

Corrected: while **53.3% of women in the 45 to 54 age group**

Reason: Missing preposition and incorrect phrase structure.

Case 11

Original: physical **acitivity**

Corrected: physical **activity**

Reason: Spelling mistake.

Case 12

Original: Around 47% of Australian

Corrected: Around 47% of **Australians**

Reason: Plural noun is required.

Case 13

Original: kept a regular basis to do physical activity

Corrected: **engaged in physical activity regularly**

Reason: The original expression is unnatural and ungrammatical.

Case 14

Original: between men and women the whole year

Corrected: between men and women **during the whole year**

Reason: Missing preposition.

Case 15

Original: at the same time.**What's more**

Corrected: at the same time. **What's more,**

Reason: Missing space and comma.

Case 16

Original: the average proportion of **male**

Corrected: the average proportion of **males**

Reason: Plural noun is required.

Case 17

Original: than that of **female**

Corrected: than that of **females**

Reason: Parallel structure and plural form are needed.

Score Improvement Suggestions

Case 1

Original: The proportion of males doing regular physical activity

Corrected: The proportion of males **engaging in** regular physical activity

Reason: “Engaging in” sounds more formal and academic.

Case 2

Original: saw the highest proportion

Corrected: **recorded** the highest proportion

Reason: “Recorded” is more suitable for data description in IELTS Task 1.

Case 3

Original: kept a regular basis to do physical activity

Corrected: **participated in regular physical activity**

Reason: This phrase is more natural and formal.

Case 4

Original: What's more

Corrected: **In addition**

Reason: “In addition” is more appropriate for academic writing.

Vocabulary Enhancement

Case 1

Original: compare

Corrected: illustrate, present, show, depict

Case 2

Original: highest proportion

Corrected: peak figure, largest percentage, highest rate

Case 3

Original: regular physical activity

Corrected: routine exercise, regular exercise participation

Case 4

Original: difference

Corrected: gap, disparity, variation

Corrected Essay

The bar chart compares the percentages of Australians in different age groups between men and women who did regular physical activity in 2010.

The proportion of males doing regular physical activity was higher than that of females in the age group between 15 and 24. However, the percentage of Australian men who engaged in regular physical activity was lower for all age groups aged 25 and over.

Males who were between 15 and 24 years old recorded the highest proportion in 2010 at 52.8%, while 53.3% of women in the 45 to 54 age group did regular physical activity. Around 47% of Australians who were over 65 years old engaged in physical activity regularly.

The age group 35 to 44 recorded the largest difference between men and women during the whole year, and the percentage of women was the lowest at the same time. In addition, the average proportion of males was higher than that of females in 2010.
